

Copper Paste (Maximum Temperature Lubricating Paste) **diamant®**

Version: 17.09.2025

Area of Application

The highly concentrated copper paste reduces wear and prevents seizing. Wear and corrosion are prevented. Also suitable as an assembly aid and rust protection. Does not harden and is hot water resistant.

Examples of Use

Machinery, civil engineering and road construction, mining and shipbuilding, chemical industry. On components exposed to high temperatures, high pressure, corrosion, and solvent attack. For all types of screw connections, flanges, bolts, seals, valves, couplings, pins, chains, gear wheels, and combustion systems.

Not suitable for bearing lubrication!

Base oil	Mineral oil
Thickening agent	Copper powder, bentonite
Dropping point	None
Temperature range	-20 to +1,000°C

Properties

Temperature stable

Pressure resistant

Silicone-free

Water repellent

Hot water resistant
