

# Brass fitting grinding compound **diamant**<sup>®</sup>

## Oil-soluble

Version: 06.08.2025

For working with brass and other non-ferrous metals such as copper, zinc, or nickel. For grinding valves, taps, bearings, and nozzles on compressors, machines, and precision mechanical parts. Can be diluted and washed off with oil, petroleum, or gasoline..

### Properties:

Washable with oil, petroleum, gasoline, etc.

Can be diluted with oils

## Grain size:

This abrasive compound is based on a mixture of highly calcined alumina. These are broken down under the mechanical influence of grinding.

This allows coarser and finer grinding tasks to be completed in a single operation.

Since the grain breaks down itself, no FEPA classification can be specified for this grinding paste.
